

Quick Tip

ACCREDITATION | April 3 to 6, 2023

Antimicrobial Stewardship

Q-Tip #4

- Antimicrobial stewardship is an activity that includes:
 - Appropriate selection,
 - Dosing,
 - Routine and duration of antimicrobial therapy.
- Antimicrobial Stewardship Committee is PRH's multi-disciplinary team that(is) responsible for:
 - Implementing education
 - Identifying strategies for streamlining or de-escalation of therapy
 - Auditing and providing feedback
- Priority interventions are decided based on monitoring and tracking of antimicrobial prescribing, patient outcomes and resistance patterns (i.e. *C.difficile* infection)

*Limit the emergence and transmission
of antimicrobial resistant bacteria!*

It's Our Time to
SHINE again!
