

Quick Tip

ACCREDITATION | April 3 to 6, 2023

Heparin Safety

- Heparin is a high-alert medication
- PRH ensures Heparin safety by:
 - Limiting availability
 - Not stocking high-dose formats in patient care areas
 - Pre-filled syringes of low molecular weight Heparin (i.e. Enoxaparin) is available instead of multi-dose vials
- Medication Management Committee is PRH's multi-disciplinary team that(is):
 - responsible for identifying and mitigating risks associated with the medication system
 - reviews and approves the rationale for availability of high-alert medications
 - ensures safeguards are put into place to minimize risk of error.

Q-Tip #2

It's Our Time to
SHINE again!

Ensure Medication Safety!
